

## **EUROSLOT Series 300**

Functionality and high-quality appearance for a wide range of applications

# Data sheet

## EUROSLOT Series 300

Despite its fine, understated lines, the EUROSLot 300 Series is a genuine all-rounder among slotted screen facade claddings. It manages to combine tough material properties with a slender design and therefore offers a wide range of application options. For example, it is suitable for use as a large-scale facade cladding and as a cover for high-load walkways or ventilation shafts. Although the profile wires of the EUROSLot 300 Series are just 3 mm thick and the supports as little as 2 mm, they are extremely strong and durable thanks to their high-quality stainless steel finish.

### Technical data:

Wire	Width mm	Height mm	Rod	Width mm	Height mm
300	3	4.62	10x2	2	10

Grid	Material AISI	Slot (@) mm	Open area %	Weight kg/m <sup>2</sup>	Thickness mm
303	304/316L	3	50	16.5	14
305	304/316L	5	62.5	13.2	14
307	304/316L	7	70	11.2	14
30x-spe(*)	304/316L/Duplex	(x)	(x)	(x)	(x)

(\*) : special needs : We can adapt the slot size according to your needs from 1mm to several centimeters. We keep available other support rods that can be spaced @ multiple of 25 mm
